## Front-end Development

React Angular Nextjs

TypeScript

## Back-end Development

.Net Nodejs Php

## Database

MongoDB MySQL

PostgreSQL

## Blockchain

Ethereum Solidity

Web3js

## Other

Git Docker Python

Java

## Languages

English (Fluent)

Turkish (Native)

## Interests

## Web Development

React

Angular

Nextjs

.Net

Nodejs

## Blockchain

Ethereum

Solidity

Web3js

## Summary

Experienced Full-Stack Developer with a creative edge, devoted to exploring cutting-edge web technologies and harnessing the power of blockchain solutions. Proficient in React, Angular, .NET, Node.js, and Solidity, I specialize in crafting exceptional user experiences and writing clean, efficient code. From dynamic web applications to innovative blockchain projects, I bring versatility to every endeavor. Let's join forces and bring your digital dreams to life!

## Experience

Monassist Software  
Front-end Developer

09/2022 - Present

Contributed to the development of dynamic web applications, creating seamless interfaces and implementing features for efficient user interaction.

- Maintain web apps with Angular, Nextjs and React.

07/2022 - 08/2022

Turkish Aerospace  
Summer Intern

Completed a highly successful summer internship, honing skills in React and .Net development while contributing to real-world projects.

09/2021 - 06/2022

Turkish Aerospace  
SKY Experience Trainee Engineer

Participated in the prestigious SKY Experience program, gaining hands-on experience in React and Nodejs while working on aerospace-related projects.

## Open Source Projects

**Etl Project** · etl.monassist.com

04/2023 - Present

Empowering users to extract, process, and save data from diverse sources using Nextjs. Crafted a captivating promotional website with Tailwind to showcase the application.

- Nextjs
- React
- Tailwind

## Product Ownership Inquiry

05/2023 - 06/2023

Revolutionizing transparency with a blockchain-based solution for viewing product ownership history. Designed the front-end to seamlessly interact with the Solidity smart contract.

- Solidity
- Front-end

**Task Management System** · wf.monassist.com

09/2022 - 02/2023

Pioneered a streamlined system for project and task management at Monassist using Angular. Presented this innovative solution with a robust .Net back-end for Senior Design Project at the university.

- Angular
- .Net

## Event Sharing Platform

05/2022 - Present

Empowering communities to share and participate in events through a user-friendly React-based platform.

- React

Artificial Intelligence

Machine Learning

Deep Learning

## Hotel Reservation Website

04/2021 - 06/2021

Devised my inaugural web project - a sophisticated hotel reservation site with a user-friendly interface and efficient Php backend.

- Php
- Database Design

## Education

### Akdeniz University

09/2019 - 01/2023

Bachelor of Science Computer Science Engineering

## Volunteer

### Akdeniz University Entrepreneurship Club

09/2021 - 06/2022

Media and Digital Department Coordinator

Led a dynamic team, managed social media accounts and announced organized events for the campus community.

### IEEE Akdeniz University Student Branch

09/2022 - 02/2022

Computer Society Vice Chairman

Organized events and provided trainings in the field of computer science.
